Trouble Shooting

A few common hardware problems and suggested solutions are presented in the table below:

No.	PROBLEM	SOLUTION
1	Can't turn on the machine.	① Check whether external power supply is normal and whether the power adapter is connected. ② Check that the indicator light is on.
2	The LCD screen is not clear	Set the screen resolution to 1366*768.
3	Unable to connect to the network	Make sure the LAN cable is OK. Check that the wire plug is properly installed.
4	System date is incorrect	Change the BIOS or system time and replace the battery if it is not valid

 **NOTE:** Please don't dismantle the machine without related guide. Please consult your supplier or service provider first if problem can't be solved.
